EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows: Page 3, Line 10: The word "a" before the word "an" should be deleted.

2. The following is an examiner's statement of reasons for allowance:

Routing leads through inductive couplers is not new in the prior art of power line communications. The apparatus taught by **Brown et al** [U.S. 6,563,420] passes first and second conductors through a current transformer. However, the prior art does not teach an inductive coupler through which a coaxial power cable is routed wherein the power cable has a center conductor and outer conductor in conjunction with a lead being routed through the aperture wherein the lead connects the outer conductor to a termination.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Burkett et al [U.S. 4,075,675] monitors the continuity of a ground conductor in a power transmission system.

Fernandes [U.S. 4,709,339] is directed to sensor modules mounted directly on power lines.

Fernandes [U.S. 4,855,671] provides both data transmitting and receiving means in a sensor module.

Brown [U.S. 5,949,327] provides an overhead balanced electrical distribution network.

Lehmann et al [U.S. 6,255,935] relates to a simplified and cost-effective apparatus for injecting signals into electrical power lines.

Wendt et al [U.S. 6,577,230] teaches a network for data and energy transfer.

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to John A. Tweel, Jr. whose telephone number is 571 272 2969. The examiner can normally be reached on M-F 10-6:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jeff Hofsass can be reached on 571 272 2981. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
